## The Rexener Polar Hot Tub

- Runs on diesel or bio diesel
- Offers very low operating costs
- Heats from 8-38°C in 2hrs
- ALL water can be drained from footwell
- Simply press the button and the heater will do the rest
- No more complaints water is too hot or cold
- Water flows through sand and Uv light filter whilst the tub is running
- UV C filter cleans and purifies the water preventing formation of algae

## MASSIVE benefits for you

- Do not need to keep the tub heated when not in use
- Last minute booking means tub can be heated in short notice
- will run on 10amp electricity
- 2ltrs of diesel per hr while heating the water
- Top of the range filtration system (Sand & UV C)
- Enables water change between check out and new guest arrival.
- Tub can be run on time clock to further reduce running costs
